International Symposium on Tumor Biology in Kanazawa 2008

January 24, 2008
2008年1月24日（木） AM8：50～PM5：10
Museum of Kanazawa University School of Medicine

金沢大学医学部記念館

Shigeki Higashiyama ( Ehime University)
Inner Nuclear Membrane Translocation of Plasma Membrane-anchored Growth Factors; Its molecular mechanisms and pathophysiological roles in tumor cells

Neil Bhowmick (Vanderbilt University, USA)
TGF-β1 in tumor-stromal interactions

Takuro Nakamura (Japanese Foundation for Cancer Research)
Identification of New Molecular Pathways in Carcinogenesis by Retroviral Tagging

Shyam K. Sharan (National Cancer Institute, USA)
A Mouse Embryonic Stem Cell Functional Based Assay to Study Variants Identified in Human Breast Cancer Susceptibility Genes

Kyu-Sil Choi (Wonkwang University, South Korea)
In Vivo Assessment of Tumor Angiogenesis Using Molecular Imaging

Hideki Taniguchi (Yokohama City University)
Excessive Self-renewal of Hepatic Stem Cells Drives Cancer Initiation

Hiroko Oshima (Kanazawa University)
A Novel Gastric Cancer Mouse Model by Transgenic Expression of Wnt1 and ProstaglandinE2

Masanori Hatakeyama (Hokkaido University)
Cellular Targets of Helicobacter pylori CagA in Gastric Carcinogenesis

Xueguang Zhang (Suzhou University, China)
Expression of CD40 on Glioma and the Relationship with Tumor Angiogenesis

Masaaki Nakaya (Kanazawa University)
Cell Polarity, Regulation and Cancer Metastasis

Organizers:
Kanazawa University Cancer Research Institute, Kanazawa Association of Tumor Biologists

〒920-8542 金沢市宝町13-1 TEL 076-265-2799/FAX 076-234-4527 E-mail:t-somu3@ad.kanazawa-u.ac.jp
